High precision and accurate heading of 0.25° (SC-130) Perfect for Radar, ECDIS, AIS, Doppler Sonar and Autopilots

SATELLITE COMPASS

Model **SC-70/130**

Standard High contrast 4.3" Color LCD
(on the screen, the THD mode)
SC-702

The SC-70 and SC-130 are the latest satellite compasses, built on FURUNO's commercial-grade technology platform.

These satellite compasses prove their value by increasing the accuracy of other devices, such as Radar, ARPA, Scanning Sonar, Current Indicator, Chart Plotter, ECDIS and Autopilots.

They provide a highly accurate heading input to these other technologies by utilizing the very latest GNSS (Global Navigation Satellite System). This satellite system is comprised of GPS, Galileo and GLONASS to ensure the highest

precision and a continuous coverage.

The SC-70 and SC-130 provide a variety of data, including GPS Positioning, SOG (Speed Over Ground), COG (Course Over Ground), ROT (Rate Of Turn) and 3-axis speed (bow, stern and longitudinal).

All of these data assist with critical maneuvers, such as berthing.

These compasses are maintenance free and are a great asset for any vessel.

Features

▶ SC-130 features a Tri-sensor antenna that provides a high system accuracy for the heading of your vessel

Provides highly accurate heading data for autopilot, Radar, ARPA, Scanning Sonar, Current Indicator, Chart Plotter, ECDIS and Autopilots.

- **0.25° (with SC-130)**

Ideal for medium to large vessels navigating in crowded ports and making precise maneuvers, such as berthing.

- **0.4° (with SC-70)**

Ideal for small to medium boats requiring highly accurate heading.

▶ Utilizes GNSS such as GPS, Galileo and GLONASS for high-precision attitude

• Eliminating the problem of not having enough satellites at hand by using multiple types of satellites.

▶ Provide precise data for SOG, COG, and L/L

▶ Speed on 3 axis (bow, stern and longitudinal) for safe navigating and berthing

▶ IMO Type-approved as THD, GPS and ROTI. Complying with the IEC, ISO requirements

▶ Easily integrated into the existing shipboard network via Ethernet

▶ Rapid follow-up rate 40°/s (twice the IMO high speed craft requirement, 20°/s)

▶ Maintenance free and no recurring cost as there are no mechanical parts

▶ Super short starting time - 90 seconds

• once the power is on, it takes about 90 seconds to start (the starting time will slightly differ depending on the equipment location)

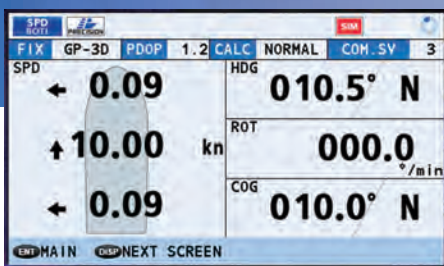

▶ Easy to retrofit by using existing antenna cabling

• For SC-50/55/60/110/120. (The LAN_CNV option kit is necessary)

▶ Precision pitch/roll data in Analog and Digital formats for vessel stabilization, Sonar, etc.
